

Thirtha Raj Nayek

Cybersecurity Consultant | SupportYourApp (Check Point)
CTO & Partner | Rajgriha Consulting

Technology, partnerships and access to learning.

My work brings together a technical support and cloud services background with current projects in international collaboration and grassroots educational infrastructure.

Microsoft 365 · Azure · Cybersecurity

CURRENT DIRECTION

At Rajgriha Consulting, my current focus includes international partnership proposals and grassroots education projects, alongside exploration of AI-enabled outreach and digital services.

SKILLSET AT A GLANCE

Cloud & security	Microsoft 365, Azure, Active Directory, cybersecurity, SASE and data migration.
Technical & client advisory	Troubleshooting, technical writing, client communication and team collaboration.
Programme development	International collaboration proposals, educational project planning and learning-resource development.
Technical management	CRM, workflow automation, application integration and onboarding.

Connecting institutions across borders

RusIndica — a programme vertical of Rajgriha Consulting

MY INVOLVEMENT

My current consulting work includes international collaboration projects. I have been developing and refining RusIndica proposal materials, with attention to programme scope, institutional roles, clear communication and consistent presentation.

EDUCATIONAL BRIDGE PROGRAMME

A supported India-Ural student pathway

The proposal brings together institutional outreach, programme selection, document checks, language preparation, application support and first-year follow-up for non-medical university study.

INDIA-RUSSIA SKILL BRIDGE

A structured talent-mobility proposal

The programme design connects employer demand, candidate verification, training, language readiness and post-arrival support. Its technology component centres on organised records and coordinated workflows.

WORK PRODUCTS & PROJECT STAGE

Work products include detailed programme proposals, revised branded materials and a bilingual Russian-English education proposal. The initiatives remain proposals: institutional agreements, admissions and placements are subject to confirmation.

Lokankur: learning rooted in everyday life

A grassroots educational programme | Classes 6–8

PROJECT FOCUS

My current work at Rajgriha Consulting includes grassroots educational infrastructure. Alongside this, I am developing learning-resource concepts intended for students in Classes 6–8, with rural and semi-urban Bihar and India as an important context.

LEARNING RESOURCES

Six illustrated learning-book drafts

The programme covers World, Civic Life, Thinking, Art & Culture, English & Expression, and Science. Stories, questions and activities connect familiar places and everyday experiences with wider ideas.

MY CONTRIBUTION

I have been shaping the target age group, reviewing the depth and balance of content, requesting stronger visual explanations and asking for bibliographies. I have also been exploring a project identity that reflects its local educational setting.

DESIGN PRIORITIES

Keep the language appropriate for Classes 6–8. Give lighter modules greater substance. Use images and activities to make abstract ideas concrete. Maintain a consistent identity across the series while allowing each book to stand on its own.

STAGE & SUPPORTING WORK

Six illustrated learning-book drafts have been developed. Programme delivery and learner outcomes remain to be tested.

A foundation in practical technical support

Cloud services, cybersecurity and Secure Access Service Edge (SASE)

JUL 2025 - PRESENT / SUPPORTYOURAPP (CHECK POINT)

Cybersecurity Consultant

Advise clients on cybersecurity measures, prepare and manage technical reports, and collaborate with colleagues. This role combines technical communication with attention to client needs.

JAN 2024 - APR 2025 / SHERWEB

Business Technical Advisor III

Advised businesses on technical solutions, primarily across Microsoft 365 and Azure services. Used critical thinking to troubleshoot complex issues and connect technical guidance with business operations.

OCT 2022 - MAR 2023 / CONCENTRIX

Senior Technical Advisor

Resolved diverse technical issues and produced technical documentation. The work centred on explaining solutions clearly and supporting customer satisfaction.

TECHNICAL FOUNDATION

Microsoft 365 and Azure · Active Directory · Cybersecurity · SASE · Data migration · Technical writing · Client management

Education: B.Tech in Computer Science, RCC IIT (2016–2022).

Certification: AZ-104 — Microsoft Certified Azure Administrator.

Selected work & emerging initiatives

Client support and programme development | New service concepts

WORK SAMPLE 01 / AZURE INFRASTRUCTURE

Contribution: Assisted multiple major Microsoft clients with setting up Azure infrastructure.

Skills demonstrated: Azure, cloud infrastructure migration and client assistance.

Presentation: Anonymised project summary; client identities and environment details omitted.

WORK SAMPLE 02 / LOKANKUR GRASSROOTS EDUCATION

Contribution: Shaping a grassroots educational programme for Classes 6–8, grounded in rural and semi-urban Bihar.

Work product: Six illustrated learning-book drafts and a programme name, design and purpose document.

Stage: Drafts developed; programme delivery and learner outcomes remain to be tested.

AI CALLING / FEASIBILITY & VENDOR EVALUATION

Evaluating large-scale voice outreach

Exploring AI-assisted calls using a sampled voice, with a potential 1,000-user test and longer-term scale of 10 million people or more. Work includes defining vendor questions and preparing meeting-request materials.

TECHNICAL MANAGEMENT, CRM & AUTOMATION / BUSINESS CONCEPT

Connecting onboarding and operations

Exploring a service business combining technical management, CRM and automation to connect applications, organise workflows and support onboarding. The current focus is defining the service and assessing how AI assistance can support delivery.
